Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

	Application No.	Applicant(s)				
Office Action Commence	10/521,645	ITO, TOMOAKI				
Office Action Summary	Examiner	Art Unit				
	David D. Davis	2627				
The MAILING DATE of this communication apperent of the Period for Reply	ears on the cover sheet with the c	orrespondence address				
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. Receipt is acknowledged of the Information Disclosure Statement (IDS) received January 13, 2005.

Specification

3. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2 and 4 are rejected under 35 U.S.C. 102(b) as being anticipated by Ito (US 6,379,224). As per claims 1 and 4, Ito discloses a method for recycling an optical disk made of a plastic substrate sequentially laminated with a recording layer and a reflecting layer by a raw

Application/Control Number: 10/521,645 Page 3

Art Unit: 2627

material supplier of the substrate and a disk presser who manufactures the optical disk, and optionally a trader who purchases the optical disk from the disk presser.

Inherent in Ito, based on column 1, lines 8-16, is procuring raw material for the substrate and manufacturing the raw material by arrangement of a raw material manufacturing device and by the raw material supplier of the substrate. Also, inherent in Ito is the manufacturing of the optical disk by arrangement of an optical disk manufacturing device and by the disk presser by forming the substrate from the raw material for the substrate and laminating the substrate sequentially with the recording layer and the reflecting layer. Additionally inherent in Ito is the recording of predetermined information on the optical disk by arrangement of an information recording device and by one selected from the disk presser and the trader having purchased the disk from the presser.

Ito discloses in column 2, lines 35-56 recovering a pure and lucent or transparent plastic substrate without any material constituting the recording layer and the reflecting layer by arrangement of a substrate recovery device and by one having recorded the predetermined information on the disk by abrading a disk fallen into disuse by arrangement of an abrader from the reflecting layer side without supplying water so as to break the material away from the substrate and into powder while collecting the powder by a arrangement for collecting powder.

As per claim 2, Ito discloses in column 6, lines 16-25 a step of recovering gold from the powder collected by the powder collecting arrangement.

Claim Rejections - 35 USC § 103

Application/Control Number: 10/521,645

Art Unit: 2627

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 3 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ito (US 6,379,224) in view of Tayebi et al (US 5,220,754). Ito discloses the claimed invention. See description supra. Regarding claims 3 and 5, however, Ito is silent as to a step of breaking the plastic substrate into pellets. Tayebi et al shows in figure 12 a step of breaking the plastic substrate into pellets 67.

It would have been obvious to a person having ordinary skill in the art at the time the invention was made to provide the step of breaking a plastic substrate of Ito into pellets. The rationale is as follows: one of ordinary skill in the art at the time the invention was made would have been motivated to break a substrate into pellets so that the substrate material can be used in another type of plastic item.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David D. Davis whose telephone number is 571-272-7572. The examiner can normally be reached on Monday thru Friday between 7:30-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dwayne D. Bost can be reached on 571-272-7023. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
